

# RMIT Career Mentoring Group Experience (Online)

**RMIT students gaining valuable advice and guidance from industry professionals**

**Our aim is to build our students' skills and knowledge that are needed by industry, while providing our mentors a positive and fulfilling experience.**

## **The structure**

Career Mentoring - Group Experiences have been designed to provide our mentors and students with the maximum benefit with a minimal time commitment. A Group Experience brings together 5 industry professionals and 25 RMIT students, across a 90-minute online session.

Facilitated by the RMIT Career Mentoring team, each mentor will begin by providing a quick 3 minute summary of their career journey, the skills they have built, and personal insight into the industry. All the participants then break off into online breakout rooms of 1 mentor and 5 students for 20 minute intensive mentoring sessions. Here, the mentor provides more in-depth career advice and it gives the students the opportunity to ask questions that relate to their career goals and aspirations. We then rotate the groups for another 2 x 20 minute sessions.
